

TASK CARD 11: how to check your usage

iPad

This card shows you how to check your tablet usage. Find out how much storage is left and which app is being greedy!

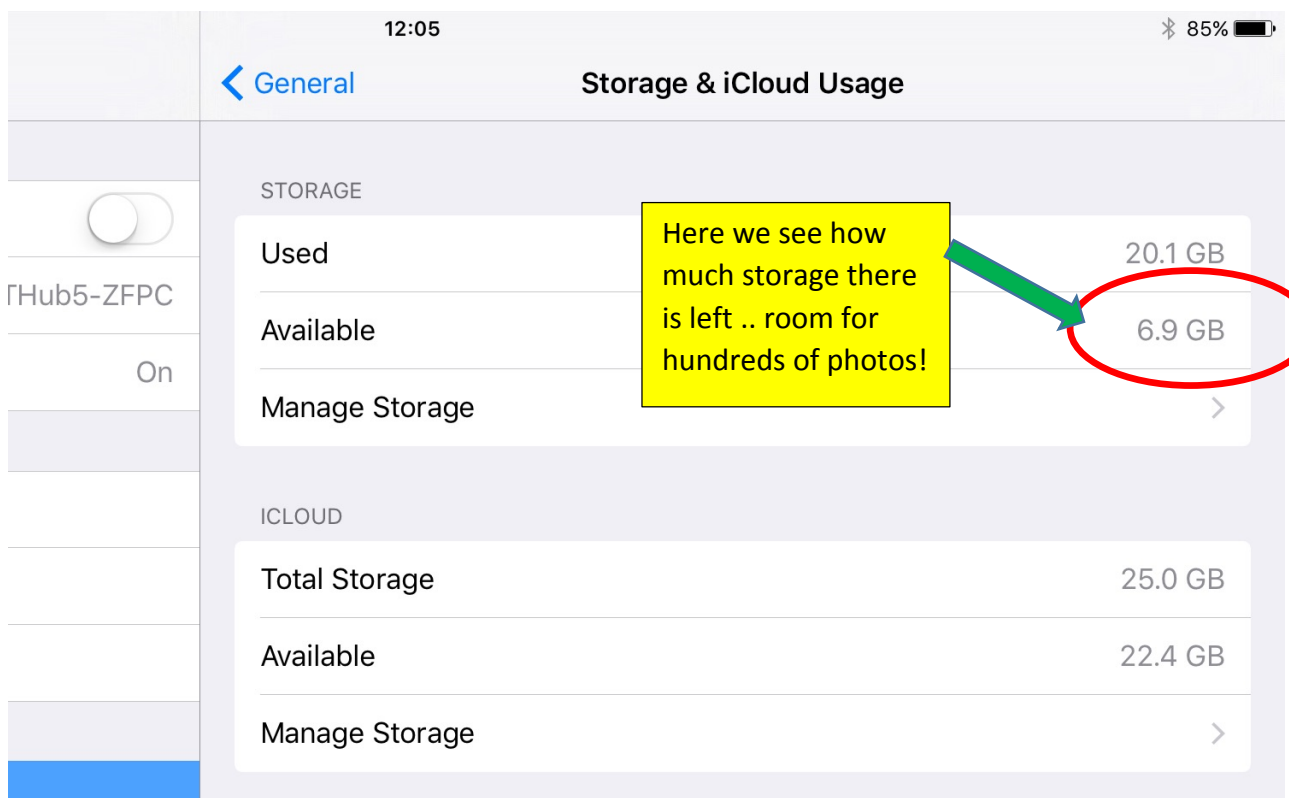

1

First tap "Settings" icon, then tap General, then tap "Storage & iCloud Usage"

2

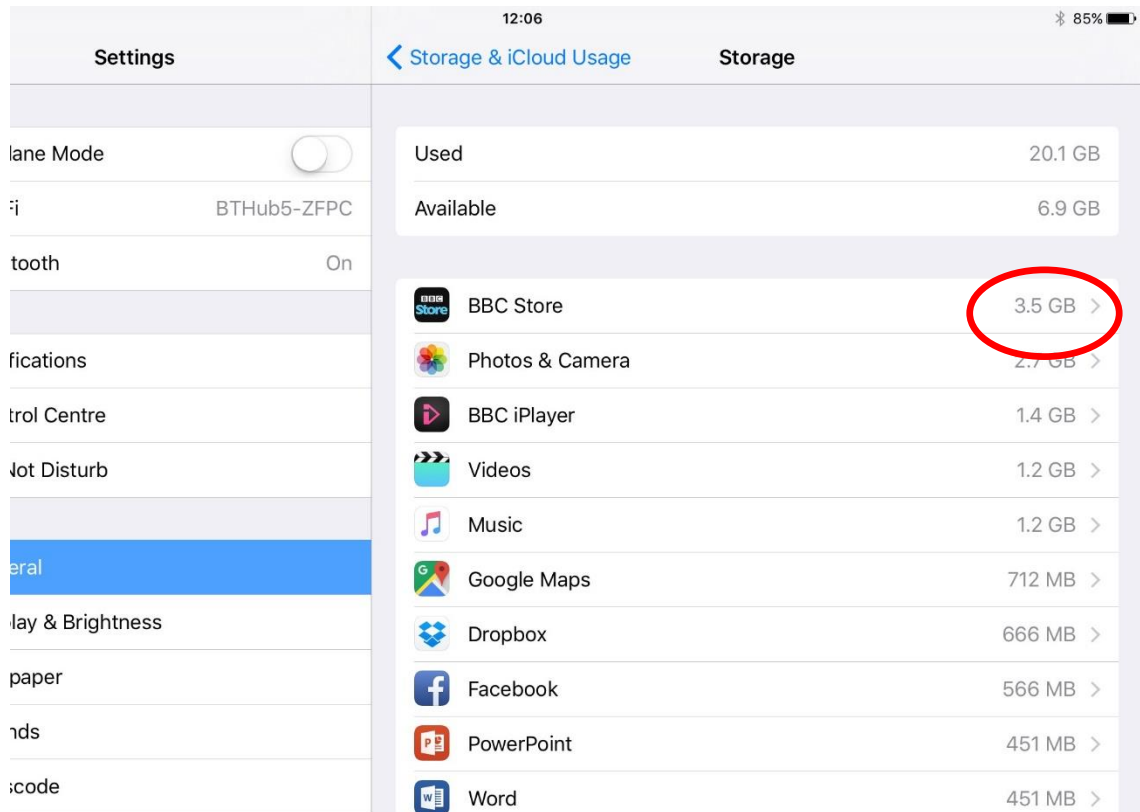

The screen now shows how much storage you are using on your iPad and on iCloud.

3

Tap "Manage Storage"

Here I can see that the greediest app on my iPad is BBC Store. This is because I have downloaded all 6 episodes of Wolf Hall. I've watched them all, so I can always delete them but I paid about £10 for the privilege so may watch them again sometime! I can do this without any internet connection.

The previous screen told me I had 6.9 GB left in memory so there is room for another downloaded series from the BBC Store if I wanted. I'd need to make sure there was enough room for my photos unless I decided to store my photos elsewhere such as Dropbox or iCloud. Looking at storage as I have shown you is really helpful in planning such as this!

Good luck!
