

# TASK CARD T1: Setting a Lock Screen Passcode

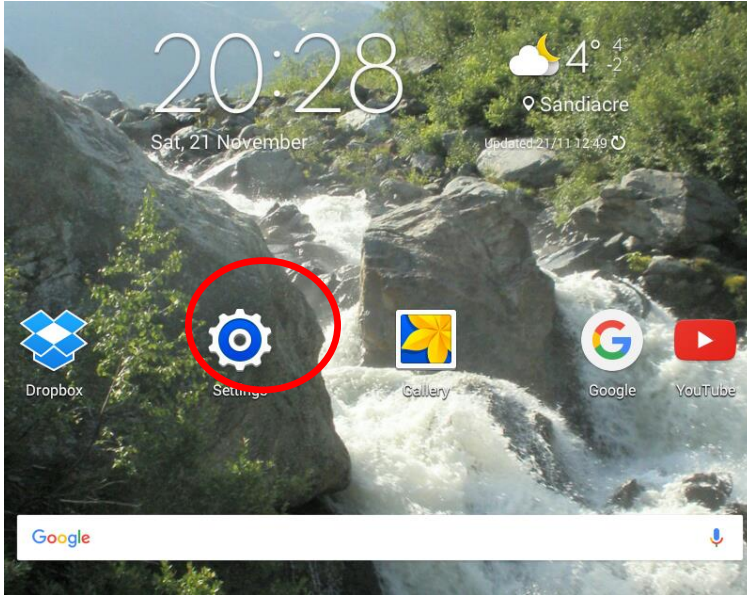

Android

This card shows you how to put a Passcode on your Lock Screen for extra security

The most important thing here is to MAKE A NOTE OF YOUR PASSCODE PIN BEFORE YOU EVEN ENTER IT ON YOUR TABLET. WRITE IT IN TWO PLACES!

1

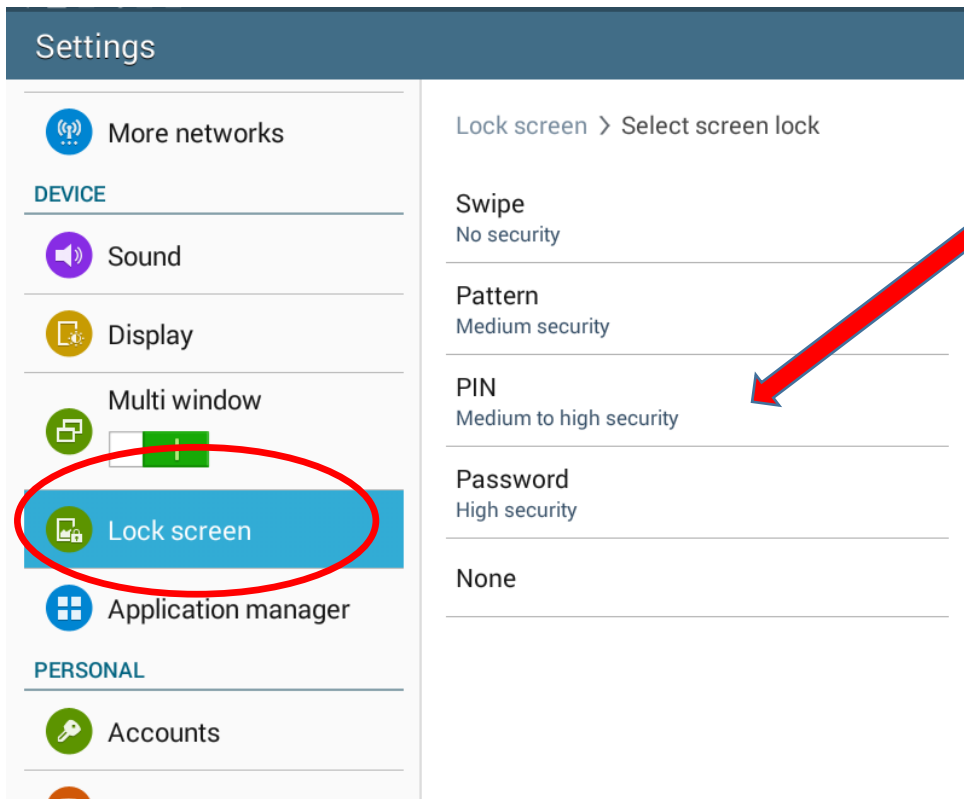

First tap "Settings" icon.

You will find it somewhere on your home screen but may have to swipe or tap "All Apps" icon to find it

2

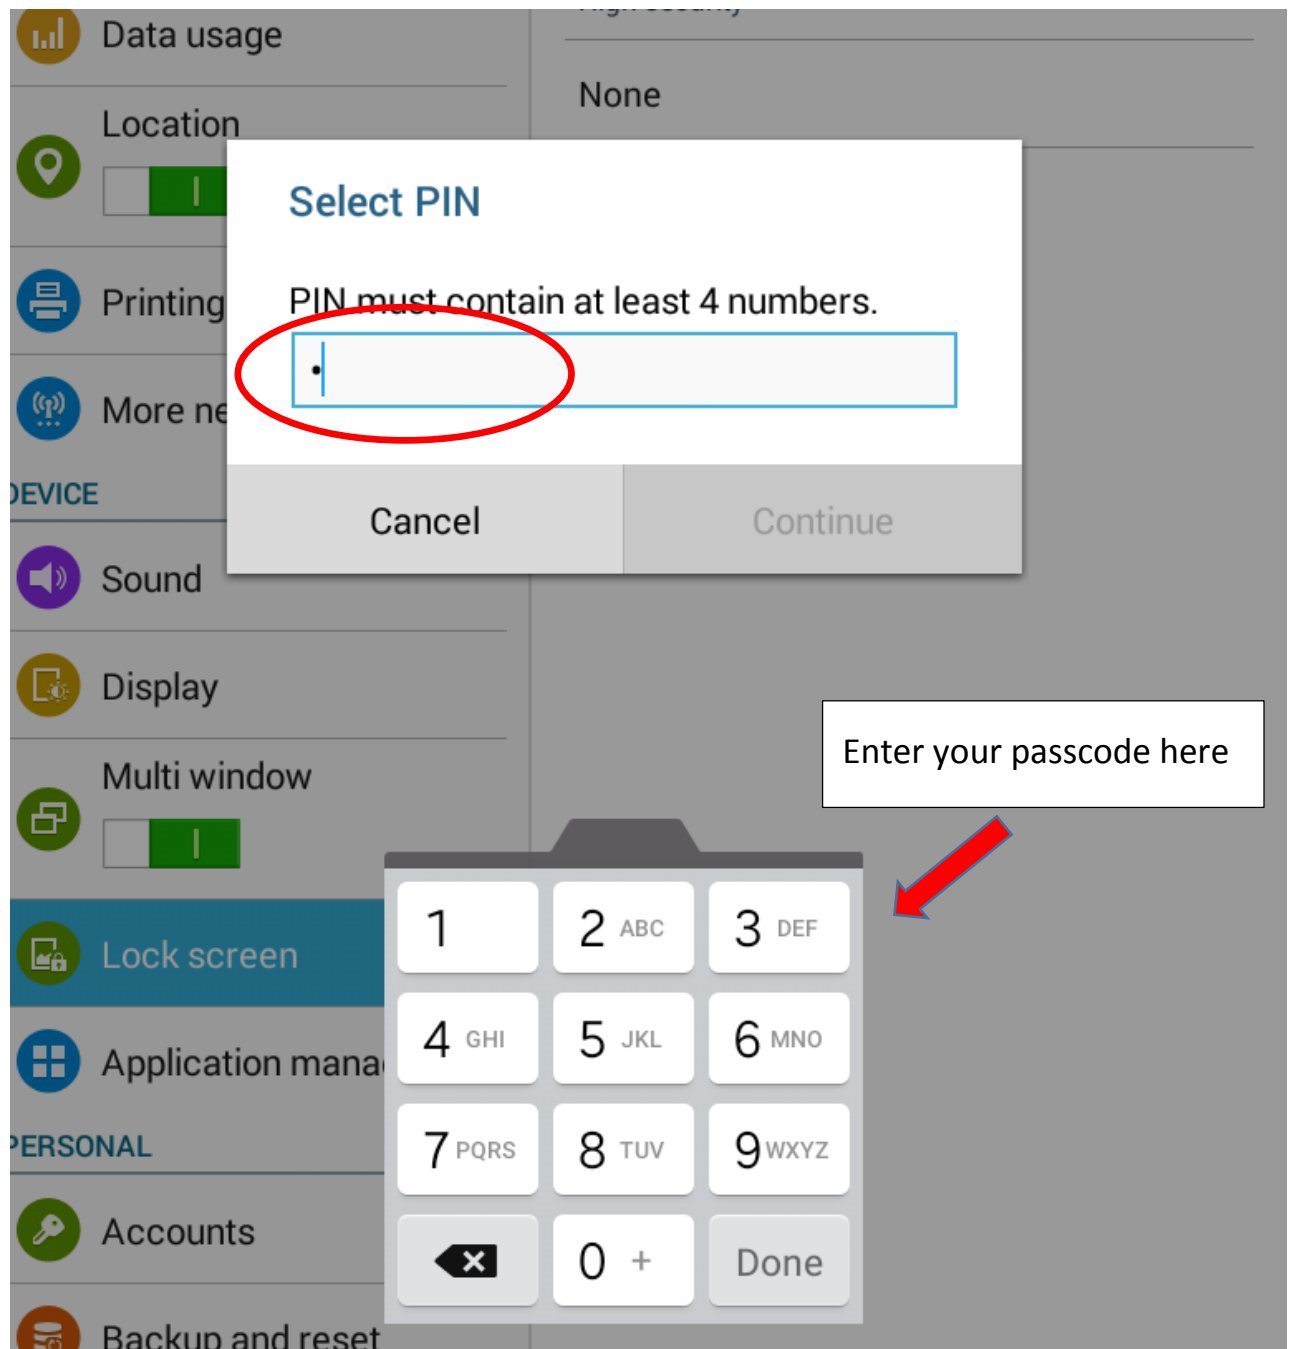

You will now see a display as below. On the left, Tap "Lock Screen". Now look on the RIGHT and tap "PIN".

3

A keyboard appears and you tap in your PIN.

**Don't forget to write it down safely.** You will be asked to confirm it.

4

To test your new security, switch off your tablet and then restart. Now you'll need your code! No one else can use your tablet unless they know the code!
