TASK CARD T7: how to print a photo

This card shows you how to print photos using the forum wireless printer

| SELECT PHOTO	:	Tap Gallery icon to open Photos. Select a photo and tap.
⬇️		
TAP SHARE ⬇️	:	Tap share icon and choose HPePrint. You will need to have downloaded this free App from PlayStore

It is well worth downloading a suitable printer app depending on what printer you are using.

The forum printer is an HP Wireless Printer so on my tablet I downloaded this app from PlayStore

- Add to Dropbox
- Bluetooth
- Drive
- Email
- Gmail
- Google+
- Hangouts
- HP ePrint
- Maps

MAKE CHOICES AND PRINT ⬇		A new screen appears. From here you can choose the no, size and quality of your prints.

Tap the icons at the top of the screen to select the option you want.

When you are happy with your selection, tap Print and VOILA, you have your photo!

Choose no of copies here

Tap "Paper" and then "Size" to select, for example, the popular 6x4 print size.

I have chosen 6 x 4 (15 cm x 10 cm) for my flower print.

If you had selected other photos to print, they would appear here

The tablet has been linked wirelessly to the HP Printer shown here. Just tap Print when ready! See card T8 for setting up a printer!
