

TASK CARD T9: how to check your storage

And

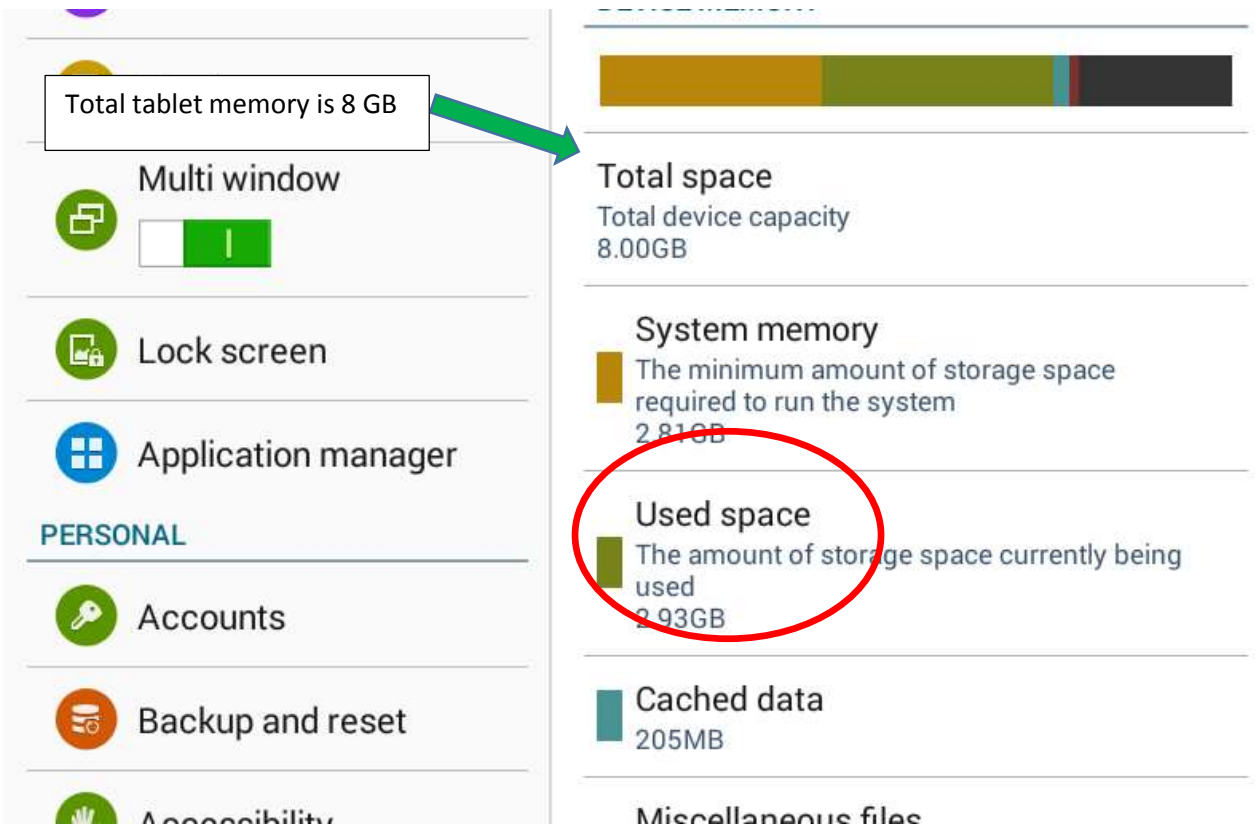

This card shows you how to check the storage on your tablet. You can find out how much room you've got left for more photos for example. If you find you are getting short of room, you can see how much storage each of your apps is using.

(Of course there are also many ways of storing or backing up your stuff online).

1 First tap the "Settings" icon on the Home Screen.

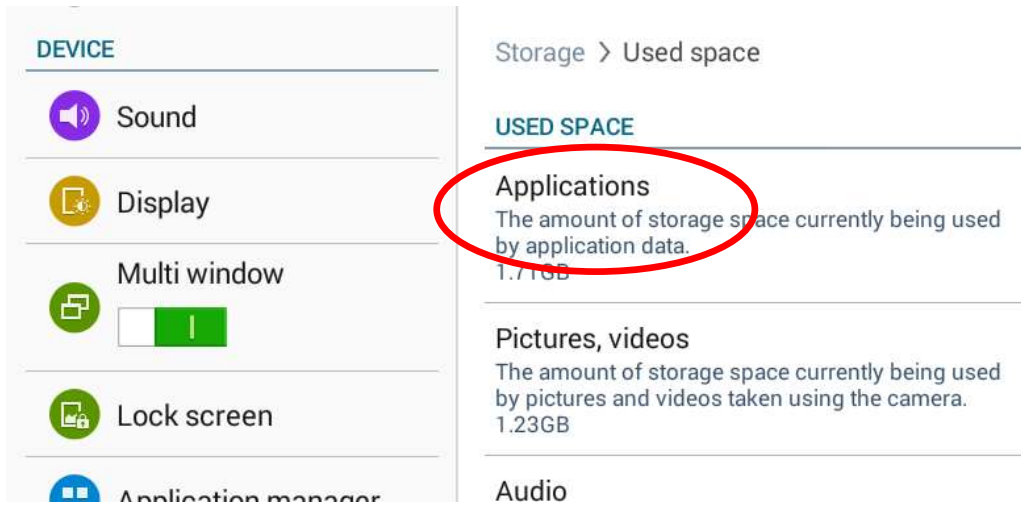

2 When the *Settings* Screen opens, scroll up on the left to find "Storage" and tap to get *Storage* Screen. Now on the right, tap on "Used Space"

3

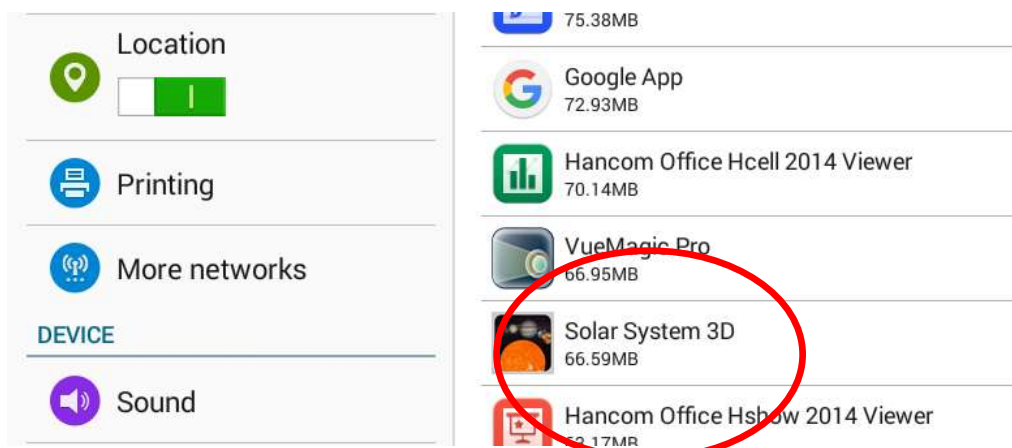

The next screen has several different areas you can check up on such as “Pictures, videos” but here we choose “Applications” to see how much storage space our various apps are using up. So tap on “Applications”.

4

On the next screen, scroll down on the right to look at all your app usage. The apps shown here all use less than 100 MB (0.1 GB) which is very small!

If you decide to delete (uninstall) an app you think takes up too much room, tap it and on next screen tap “UNINSTALL” Here I remove the app “Solar System 3D!!
